INSTRUCTION MANUAL

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: <http://www.metallographic.com>

Equipment Type: Dual Distal Superficial / Rockwell Hardness Tester

Model: **OMEGA SRT-15/150**

Electrical Requirements: 110 Volts (single-phase)

Frequency: 50/60 Hz

Manual Revision Date: September 2017 AG

Please read this instruction manual carefully and follow all installation, operating and safety guidelines.

WARRANTY

Terms and Conditions applying to all PACE Technologies Products

1. LIMITED WARRANTY AND DISCLAIMER:

PACE Technologies microscopes and hardness testers are warranted for one year from the purchase date to be free from defects in material and workmanship under correct use, normal operating conditions, and proper application. PACE Technologies obligation under this warranty shall be limited to the repair or exchange, at PACE Technologies option, of any PACE Technologies Product or part which proves to be defective as provided herein. PACE Technologies reserves the right to either inspect the product at Buyer's location or require it to be returned to the factory for inspection. Buyer is responsible for freight to and from factory on all warranty claims. The above warranty does not extend to goods damaged or subjected to accident, abuse or misuse after release from PACE Technologies warehouse, nor goods altered or repaired by anyone other than specifically authorized PACE Technologies representatives. PACE Technologies shall not in any way be responsible for the consequences of any alteration, modification or misuse unless previously approved in writing by an officer of PACE Technologies. Note: Corrosion is considered a maintenance issue and not a warranty issue.

PACE TECHNOLOGIES MAKES NO EXPRESS WARRANTIES OTHER THAN THOSE WHICH ARE SPECIFICALLY DESCRIBED HEREIN. Any description of the goods sold hereunder, including any reference to Buyer's specifications and any description in catalogs, circulars and other written material published by PACE Technologies, is the sole purpose of identifying such goods and shall not create an express warranty that the goods shall conform to such description.

THIS WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. THERE ARE NO IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE. THIS WARRANTY STATES PACE TECHNOLOGIES ENTIRE AND EXCLUSIVE LIABILITY AND BUYER'S EXCLUSIVE REMEDY FOR ANY CLAIM FOR DAMAGES IN CONNECTIONS WITH PACE TECHNOLOGIES PRODUCTS. PACE TECHNOLOGIES WILL IN NO EVENT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES WHATSOEVER, NOR FOR ANY SUM IN EXCESS OF THE PURCHASE PRICE.

2. LIABILITY CAP:

PACE Technologies maximum aggregate liability for loss and damage arising under, resulting from or in connection with the supply or use of the Equipment and Consumables provided under this purchase, or from the performance or breach of any obligation (s) imposed hereunder, whether such liability arises from any one or more claims or actions for breach of contract, tort, (including negligence), delayed completion, warranty, indemnity, strict liability or otherwise, unless otherwise limited by the terms hereof, shall be limited to one hundred percent (100%) of the purchase price.

3. DELIVERY:

Customer assumes and shall bear the risk of all loss or damage to the Products from every cause whatsoever, whether or not insured, and title to such Products shall pass to Customer upon PACE Technologies delivery of the Products to the common carrier of Pace Technologies choice, or the carrier specified in writing by Customer, for shipment to Customer. Any claims for breakage, loss, delay, or damage shall be made to the carrier by the Customer and Pace Technologies will render customer reasonable assistance in prosecuting such claims.

4. ACCEPTANCE:

Customer shall inspect the Products promptly upon receipt of delivery. Unless customer objects in writing within thirty (30) business days thereafter, customer shall be deemed to have accepted the Products. All

OMEGA SRT-15/150 Dual Superficial / Rockwell Hardness Tester

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: <http://www.metallographic.com>

claims for damages, errors, or shortage in Products delivered shall be made by Customer in writing within such five (5) business day period. Failure to make any claim timely shall constitute acceptance of the Products.

5. PAYMENT:

Customer agrees to provide timely payment for the Products in accordance with the terms of payment set forth on the reverse side hereof or in any proposal submitted herewith. If any payment is not paid on or before its due date, Customer shall pay interest on such late payment from the due date until paid at the lesser of 12% per annum or the maximum rate allowed by law.

6. DEFAULT:

If Buyer is in default (including, but not limited to, the failure by Buyer to pay all amounts due and payable to Seller) under the work or purchase order or any other agreement between Buyer and Seller, Buyer's rights under the warranty shall be suspended during any period of such default and the original warranty period will not be extended beyond its original expiration date despite such suspension of warranty rights.

7. MISCELLANEOUS PROVISIONS:

This agreement has been made in and shall be governed by the laws of the State of Arizona. All disputes arising under or relating to the purchase of the equipment shall be brought and resolved solely and exclusively in the State of Arizona, Pima County. These terms and conditions and the description of the Products on the reverse side hereof or in any proposal submitted herewith constitute the entire agreement and understanding of the parties with respect to this sale and supersede all prior and contemporaneous agreements or understandings, inducements or representations, expressed or implied, written or oral, between the parties with respect hereto. Any term or provision of this Agreement may be amended, and any observance of any term of this Agreement may be waived, only by a writing signed by the party to be bounds. The waiver by a party of any breach shall not be deemed to constitute a waiver of any other breach. Should suit be brought on this Agreement, the prevailing party shall be entitled to recover its reasonable attorneys' fees and other costs of suit including costs and attorneys' fees incurred on appeal or in collection of any judgment., errors, or shortage in Products delivered shall be made by Customer in writing within such five (5) business day period. Failure to make any claim timely shall constitute acceptance of the Products.

8. RESTOCKING FEE:

All Returns are subject to a restocking charge equal to 15% (fifteen percent) of the Invoice, unless the Goods are proved to be non-conformed by PACE Technologies.

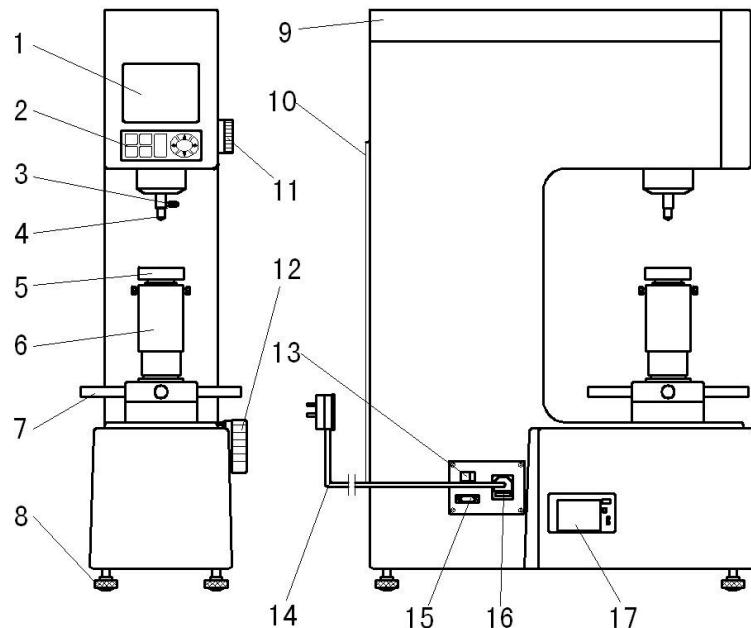

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: <http://www.metallographic.com>

OMEGA SRT-15/150 Dual Superficial / Rockwell Hardness Tester

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: http://www.metallographic.com

The OMEGA SRT-15/150 dual Superficial / Rockwell hardness testing for evaluating metallographic specimen hardness.

The OMEGA SRT-15/150 dual Superficial / Rockwell hardness tester with a load range of 15 kg 45 kg for Superficial Rockwell testing and 60 kg to 150 kg for Rockwell testing.

OMEGA SRT-15/150 Dual Superficial / Rockwell Hardness Tester

INSTRUCTION MANUAL

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: <http://www.metallographic.com>

1.2 Technical Specifications

Electrical specifications:	110 or 220V single-phase (50/60 Hz)
Test forces:	Superficial Rockwell 15 kg 30 kg 45 kg
	Rockwell 60 kg 100 kg 150 kg
Dwell time of test force:	2-60 seconds
Max. height of specimen:	175 mm (7-inches)
Distance from indentation: center to frame	165 mm (6.5-inches)
Weight:	Approx. 175 lbs (80 kg)
Dimensions (WxHxD):	Approx. 21" x 8.5" x 30.5" (525 mm x 210 mm x 770 mm)
Working temperature:	70° - 85°F (23 - 28°C)
Indenters (included)	Diamond Rockwell 1.5875 mm ball

OMEGA SRT-15/150 Dual Superficial / Rockwell Hardness Tester

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: http://www.metallographic.com

2.0 Unpacking, Shipping and Installation

2.1 Unpacking

Unit is delivered in a box. Unpack and check for completeness of parts.

Measures WxHxD: 26"x15"x36" (660x380x915 mm)

Weight: Approximately 220 lbs (100 kg)

2.2 Shipping

When moving box, lift from bottom.

! Caution: Heavy equipment. Take care to avoid bodily injury.

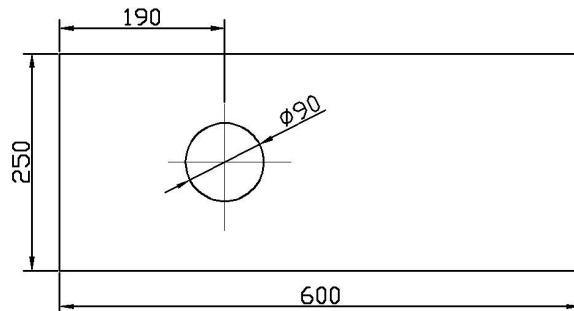

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: <http://www.metallographic.com>

2.3 Installation

Install unit carefully! Improper installation voids warranty.

The **OMEGA SRT-15/150** should be placed on a flat stable vibration free surface. If tall or high samples are to be tested so that the up / down lead screw is lowered significantly, a hole will need to be made in the table (see drawing for specifications - mm)

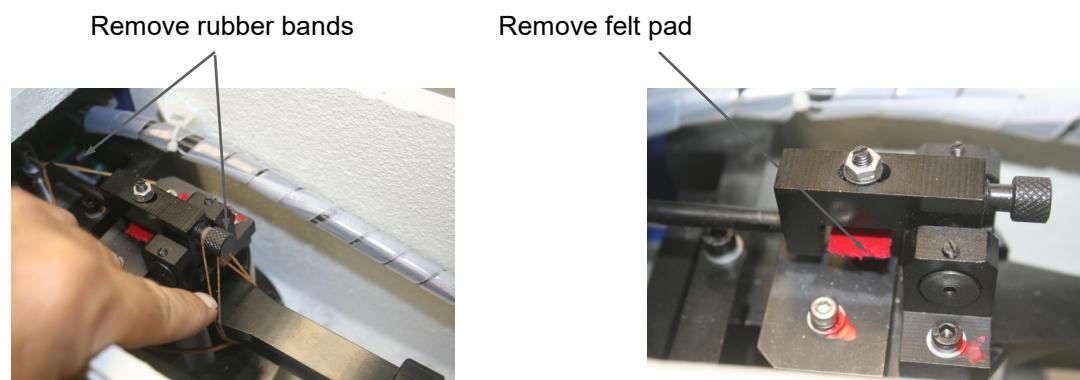

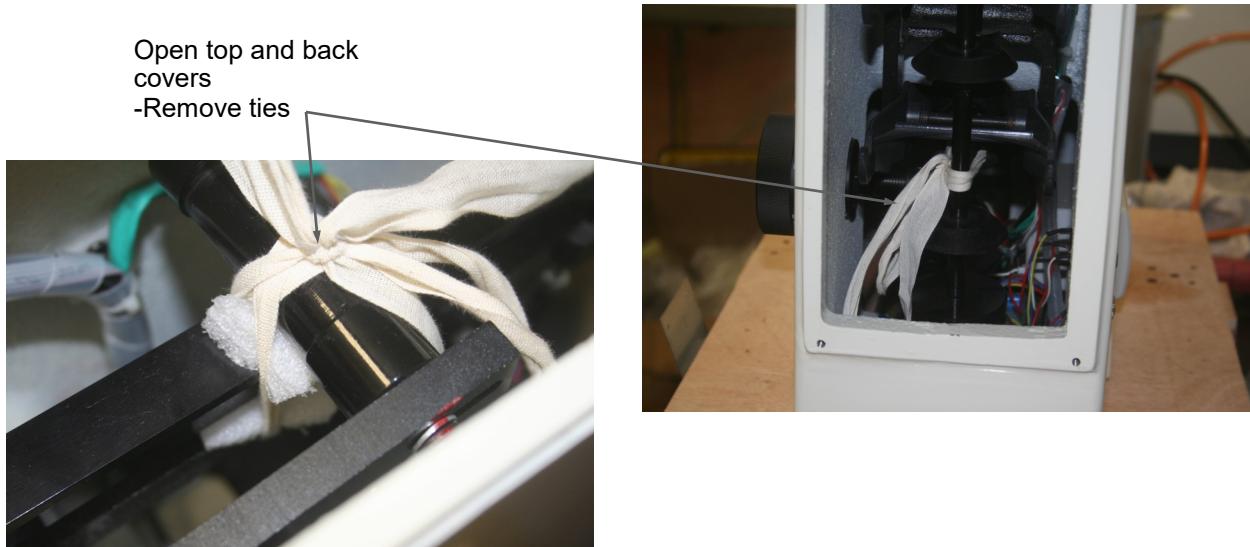

2.3.1 Install leveling feet

Attach four leveling feet and use bubble level on anvil to level unit (see section 2.3.5)

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: http://www.metallographic.com

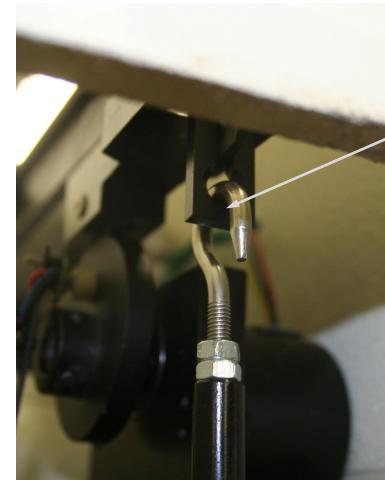

2.3.2 Remove shipping securing tie downs

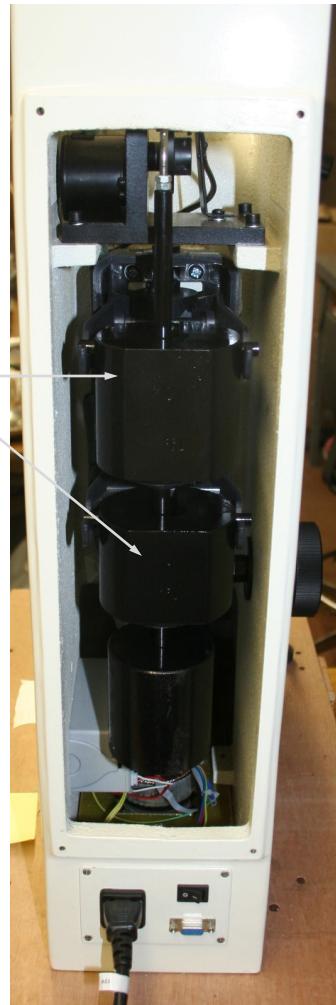

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: <http://www.metallographic.com>

2.3.3 Installing weight stack

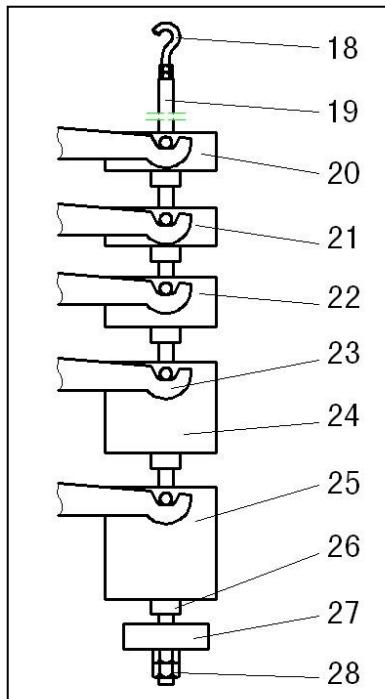

Hang weight stack holder onto loading beam

Load weights onto holder so that the pegs on the weight are aligned with the forks on the holder

Test the load stack to verify that the weights are being lifted and that they hang freely depending on the load set on the control knob

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: <http://www.metallographic.com>

- 18. Hook
- 19. Hanging rod
- 20. Weight 1
- 21. Weight 2
- 22. Weight 3
- 23. Fork lifter
- 24. Weight 4
- 25. Weight 5
- 26. Tray
- 27. Weight 6
- 28. Retaining nut

Test force for respective weights

Scale	Test Force (N)	Graduated value on Load-Change hand wheel	Weight
15N	15 kg		Hanging rod + Weight 6
30N	30 kg		Hanging rod + Weight 6 + 1
45N	45 kg		Hanging rod + Weight 6 + 1 + 2
HRA	588.4 (60 kg)	588.4 (60)	Hanging rod + Weight 6 + 1 + 2 + 3
HRB	980-7 (100 kg)	980-7 (100)	Hanging rod + Weight 6 + 1 + 2 + 3 + 4
HRC	1471 (150 kg)	1471 (150)	Hanging rod + Weight 6 + 1 + 2 + 3 + 4 + 5

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: <http://www.metallographic.com>

2.3.4 Installing Anvil Stage

Insert anvil into up/down screw feed

Raise cover and
tighten thumb
screws

2.3.5 Leveling unit

Place bubble level on
stage and adjust feet
height to level the unit

2.3.6 Inserting Indenter

Align flat end of indenter shank with the holding screw

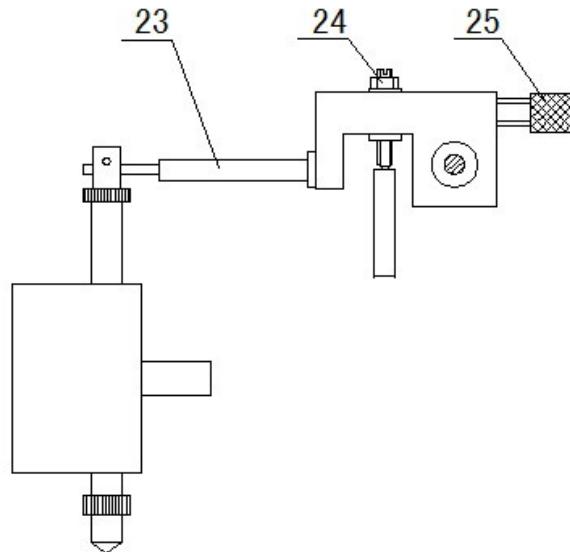

After loading indenter - run a sample indent to properly set the indenter

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: <http://www.metallographic.com>

2.3.7a Calibration (Rockwell)

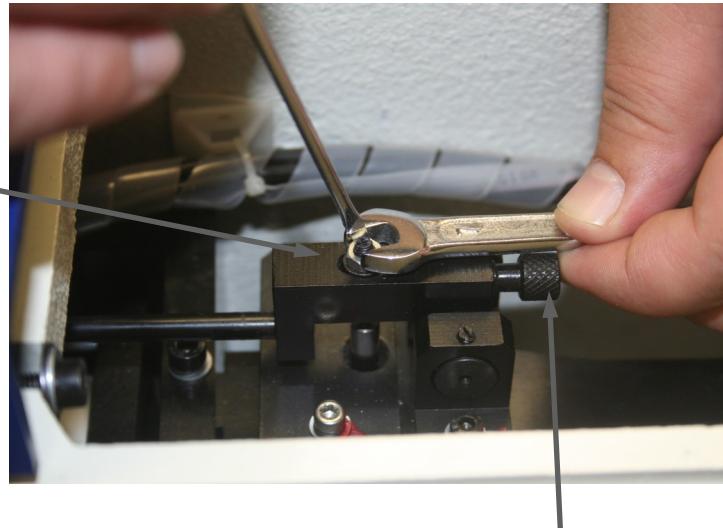

- 23. Connecting rod
- 24. Adjustment screw
- 25. Fine tuning adjustment knob

To calibrate to test blocks - hold screw in place at (24) and loosen nut, adjust screw (25)

For values reading low - adjust screw clockwise

For values reading high - adjust screw counter-clockwise

Adjustment knob

OMEGA SRT-15/150 Dual Superficial / Rockwell Hardness Tester

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: <http://www.metallographic.com>

2.3.7b Calibration (Superficial scale)

If the superficial values are not correlating to test blocks after calibrating the Rockwell use the following calibration procedure.

1. Verify that the Rockwell hardness is calibrated to certified test blocks
2. Superficial Rockwell is calibrated through the control panel
 - a. Press Menu Key (REV1) — Print Key (PRT) — Enter the revised value interface

15N 30N 45N
15T 30T 45T

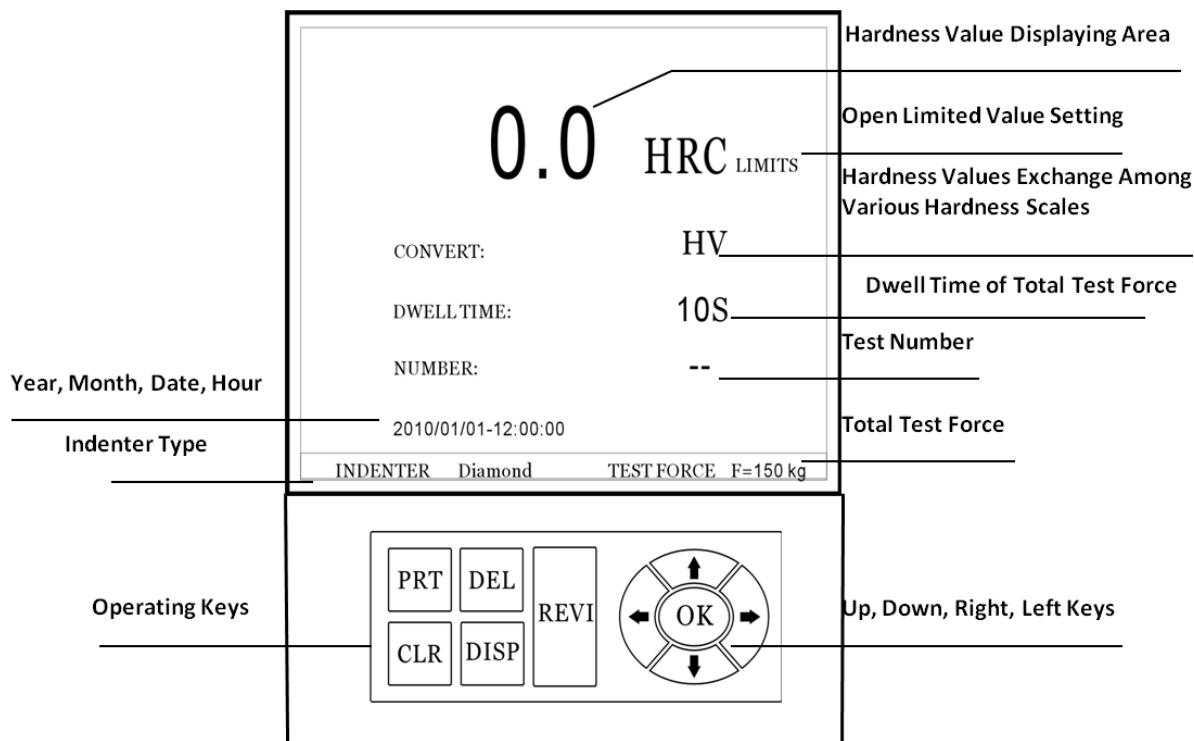

Choose the scale to adjust and press the up/down key to adjust the value

Low 0-50 Low hardness revision
High 50-100 high hardness revision

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: http://www.metallographic.com

2.3.8 Key Pad Functions

OMEGA SRT-15/150 Dual Superficial / Rockwell Hardness Tester

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: http://www.metallographic.com

2.3.8.1 <REVI> Key's Function

Press <REVI> Key to display the LCD screen to the right. The cursor will flash. Press the UP or DOWN key to select the item in the menu and then press <OK> to enter.

LIMITS	GO/NG
SCALES	HRC
TIME	2010/11/11-12:00:00
DWELL	10S
CONVERT	HV
EXIT	■

F

2.3.8.1a CONVERT:

Converts hardness values to selected scale.

Press <REVI> key to enter system setting menu. Select <CONVERT> from the menu and press <OK> to obtain selection table. Move cursor to the desired scale and press <OK>. Press <OK> key again to return to main screen.

Typical scales are listed as:

HARD - Ferrous metals;

SOFT - Non-ferrous metals.

HARD		SOFT	
HV ■	HRD	HRF	45T
HRC	15N	HRG	HBW
HK	30N	HRE	HV
HBW	45N	HRK	HK
HRA	HS	15T	HS
HRB		30T	HRB

UP DOWM OK KEY

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: http://www.metallographic.com

2.3.8.1b DWELL: (Dwell time setting)

Set the dwell time and press <OK> to save and to return to the main page.

2.3.8.1c TIME: (Date / clock setting)

Set clock setter for year, month, date, hour, minute and press <OK> to save and to return to the main page.

2.3.8.1d SCALES:

(Selection of Rockwell or Superficial Rockwell scales)

Select the Rockwell hardness scales (see top right table), or select the Superficial Rockwell hardness scales (see lower right table).

Metallic Rockwell Hardness Tester			
Indenter	F=60kg	F=100kg	F=150kg
Diamond	HRA	HRD	HRC ■
D=1.588mm	HRF	HRB	HRG
D=3.175mm	HRH	HRE	HRK
D=6.350mm	HRL	HRM	HRP
D=12.70mm	HRR	HRS	HRV

UP DOWM LEFT RIGHT OK KEY

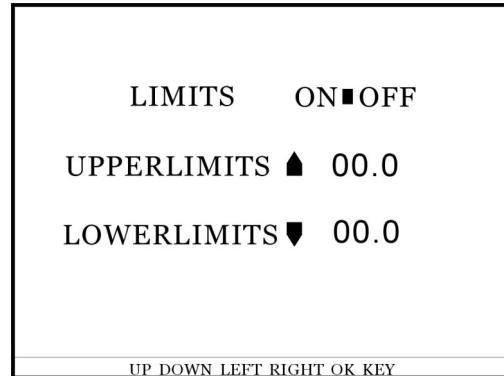

Superficial Rockwell Hardness Tester

D=12.70mm	15Y	30Y	45Y

UP DOWM LEFT RIGHT OK KEY

2.3.8.1e LIMITS: (Limit values setting)

Upper and lower limits can be set in this mode. If a hardness value is within the upper and lower limits a “GO” (qualified) value will be displayed and printed. For values outside of the set range a “NG” (unqualified) value will be higher than the lower limit.

To turn “ON” use cursor to set upper and lower limit. Press <OK> to set value.

OMEGA SRT-15/150 Dual Superficial / Rockwell Hardness Tester

INSTRUCTION MANUAL

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: <http://www.metallographic.com>

2.3.8.2

Zero's value

Delete the present measured hardness value

Prints hardness value, average value, range, number of tests, date

Display Key. When the number of operations ≥ 2 , press this key to display the hardness data of present test. To store this page, press “SAVE” key to store and return to main page. Only 6 pages can be saved (Page No. 00~05). When page No.7 is saved the first page will overflow. After power off the hardness tester, all saved pages will be eliminated.

Confirmation Key - Press to enter data

Up and Down cursor control

Left and Right cursor control

3.0 Safety Guidelines

3.1 Warning Sign

- !** This sign points to special safety features on the machine.

3.2 Safety Precautions

- !** Careful attention to this instruction manual and the recommended safety guidelines is essential for the safe operation of the **OMEGA SRT-15/150**.
- !** Proper operator training is required for operation of the **OMEGA SRT-15/150**. Any unauthorized mechanical and electrical change, as well as improper operation, voids all warranty claims. All service issues need to be reported to the manufacturer / supplier.

- !** Operate unit as specified in this manual.
- !** Disconnect power before opening unit.
- !** Lower stage to avoid damaging indenter when not in use.
- !** Cover unit with dust cover when not in use to eliminate dust contamination.

3.3 Emergency Statement

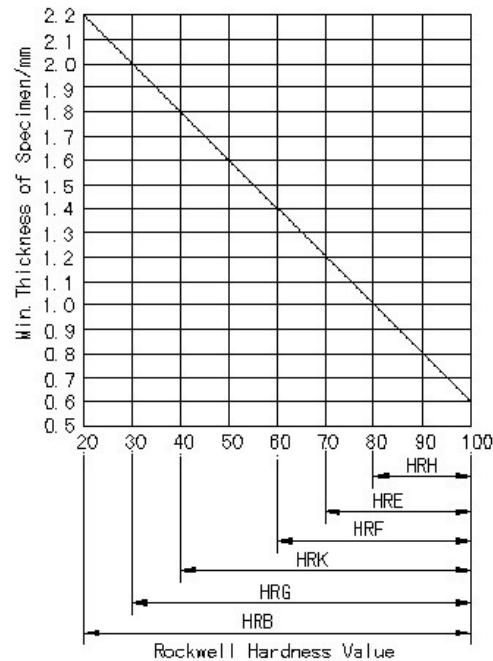

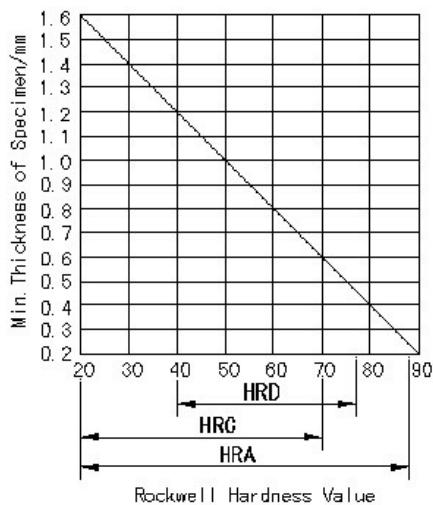

Always follow proper operational guidelines and avoid contact with lubricants and abrasives.

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: http://www.metallographic.com

4.0 Operation

1. Mount the sample so it is flat on the stage. For non-parallel mounts a leveling vice is recommended (optional)
 - Sample should be clean
 - Minimum thickness should be 10X the depth of the indentation
 - Do not test samples in a metallographic mounts
 - Sample must be secured so it does not move during loading, otherwise the indenter can be damaged

2. Turn on the OMEGA SRT-15/150
3. Select appropriate load and indenter (see following table).

OMEGA SRT-15/150 Dual Superficial / Rockwell Hardness Tester

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: http://www.metallographic.com

4.0 Operation (continued)

Rockwell Hardness Testing

Scale	Indenter Type	Initial Test Force	Total Test Force (N)	Application
HRA	Diamond Indenter	98.07 N (10 kg)	588.4 (60 kg)	Hard alloys, carbide steel, surface quenched steel, carburized steel plate
HRD			980.7 (100 kg)	Steel sheet, surface quenched steel
HRC			1471 (150 kg)	Quenched steel, tempered steel, hard cast iron
HRF	Ball Indenter φ1.5875mm (1/16 inch)	98.07 N (10 kg)	588.4 (60 kg)	Cast iron, aluminum, magnesium alloy, bearing alloy, annealed copper alloy, mild steel sheet
HRB	980.7 (100 kg)		Mild steel, aluminum alloy, copper alloy, malleable cast iron, annealed steel	
HRG	1471 (150 kg)		Phosphor bronze, beryllium bronze, malleable cast iron	
HRH	Ball Indenter φ3.175mm (1/8 inch)	98.07 N (10 kg)	588.4 (60 kg)	Aluminum, zinc, lead, etc

Superficial Rockwell Hardness Testing

Scales	Indenters	Initial Test Force (N)	Total Test Force (N)	Application Examples
15N	Diamond Indenter Ball indenter 1.5875 mm (1/16 inch) Ball indenter 3.175 mm (1/8 inch) Ball indenter 6.35 mm (1/4 inch) Ball indenter 12.7 mm (1/2 inch)	29.42 (3 kg)	147.1 (15N)	Hard alloy steel, nitride steel, carburized steel, various heavy steel plate, etc.
30N			294.2 (30N)	Surface quenched steel, carburized steel, knife blades, thin steel plate, etc.
45N			441.3 (45N)	Quenched steel, tempered steel, hard cast iron , etc.
15T			147.1 (15N)	Annealed copper alloy, mild steel sheet, brass, bronze, etc.
30T			294.2 (30N)	Mild steel sheet, aluminum alloys, copper alloys, brass and bronze, malleable cast iron, etc.
45T			441.3 (45N)	
15W			147.1 (15N)	Annealed copper alloy, mild steel, etc
30W			294.2 (30N)	Aluminum and aluminum alloys, magnesium, mild steel, etc.
45W			441.3 (45N)	Zinc, aluminum, lead, bronze, beryllium bronze, etc.
15X			147.1 (15N)	
30X			294.2 (30N)	
45X			441.3 (45N)	Aluminum, tin, zinc, soft metals, plastics, hard, etc.
15Y	Ball indenter 12.7 mm (1/2 inch)	29.42 (3 kg)	147.1 (15N)	
30Y			294.2 (30N)	
45Y			441.3 (45N)	

OMEGA SRT-15/150 Dual Superficial / Rockwell Hardness Tester

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: http://www.metallographic.com

4.0 Operation (continued)

4. Rotate Hand Wheel clockwise to move sample into indenter
 - Continue to turn wheel slowly to apply the initial test load.
 - When the buzzer sounds stop turning the initial load and let the servo motor apply the test force for the preset Dwell time (If the initial load is too fast or a buzzer will produce a long sound indicating an error in the measurement. For this situation lower the sample and move the sample to a new location and then re-apply the initial test)

IMPT: Do not rotate the hand wheel or move the specimen during application of the main load as this may damage the instrument.

5. Turn rotating wheel counter-clockwise to lower the sample. Move the sample to the second test location.
 - NOTE: the first measurement is done to set the indenter and is not included in the data
6. To print, remove load or back off sample from indenter and press "PRT" to print the output

PRECAUTIONS

Clamp the sample properly on the self-leveling vice. This will level the sample perpendicular to the indenter.

Important : This is very important as a tilted sample can damage the indenter. It is also very important to have a flat specimen. A rounded specimen will have varying height as it moves and can touch and damage the indenter.

Important : Take utmost care to insure that the sample or the leveling vice does not touch the indenter as this may damage the indenter

OMEGA SRT-15/150 Dual Superficial / Rockwell Hardness Tester

INSTRUCTION MANUAL

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: <http://www.metallographic.com>

5.0 Maintenance

5.1 Introduction

The **OMEGA SRT-15/150** requires very minimal maintenance. However, to increase the life of the Dual Rockwell/ Superficial hardness tester, it is suggested that the unit be covered when not in use.

5.2 Cleaning outside cabinet

The cabinet should be cleaned occasionally with a moistened cloth. Do not use any chemicals or cleaning abrasives.

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metalgraphic.com Web: http://www.metalgraphic.com

6.0 Trouble Shooting

More extensive trouble shooting, repair guides, video's, parts list are provided online at www.metalgraphic.com or

<http://www.metalgraphic.com/PAGE-service/Rockwell-service.html>

Phenomenon	Possible Causes	Method Used
LCD does not turn on	1. No power 2. The fuse is blown.	1. Check the power cable. 2. Change the fuse.
When the tester is on, the keys do not work	The instrument is not in working state.	When the tester is turned on, wait until the instrument returns to the working state.
The Up / Down Lead Screw is hard to move	The space between the Up / Down Lead Screws are blocked by the thread ends or dirt	Remove the protecting cover for the Up / Down Lead Screw and clean the screw threads
The deviation of the displaying hardness value is too great.	1. The indenter is damaged 2. The Weights are not installed in order. 3. The tester is not placed in the horizontal level and the weights are touching the inside wall of instrument body. 4. The total test force or the indenter are not correct. 5. The protecting cover of Up/ Down Lead Screw is to high over the supporting plane of the Testing Table	1. Change the diamond indenter or the ball indenter. 2. Install the weights properly 3. Level the tester 4. Choose the appropriate testing force and indenter 5. Lower the protecting cover and clean the Up and Down Lead Screw.
LCD hard to read	1. LCD display brightness not set properly	1. Adjust blue pod adjustment on back of LCD panel (see below)

Adjust brightness for LCD display with small screw on blue pod

8.0 Hardness Testing Basic

Hardness Testing provides useful information, which can be correlated to tensile strength, wear resistance, ductility, and other physical characteristics of the material. Hardness testing is therefore useful for monitoring quality control and for aiding in the materials selection process.

ROCKWELL HARDNESS

Rockwell hardness (HR) is an indentation hardness test that is determined with a spherconical penetrator, or hard steel ball, that is forced into the specimen surface. The test is accomplished by bringing the specimen into contact with the penetrator and allowing the penetrator to be slowly forced into the specimen surface by a series of weights acting through a system of levers. After the load is released, a dial pointer or LED screen indicates the hardness number.

Typical Applications:

- Quality control for metal heat treatment
- Materials receiving inspection
- Evaluation of welds in steels and other metal alloys
- Failure analysis

Standard Rockwell testing is at 60, 100 and 150 kg loads and Superficial Rockwell testing is at 15, 30 and 45 kg loads.

BRINELL HARDNESS

To determine a Brinell hardness number (BHN), a 10 mm diameter steel ball is typically used as an indenter with a 3,000 kgf (29 kN) force. For softer materials, a smaller force is used; for harder materials, a tungsten carbide ball is used. The BHN can also be converted into the ultimate tensile strength (UTS), although the relationship is dependent on the material, and therefore is only an empirically based value.

VICKERS HARDNESS

The Vickers test is often easier to use than other hardness tests since the required calculations are independent of the size of the indenter, and the indenter can be used for all materials irrespective of hardness. The Vickers test can be used for all metals and has one of the widest scales among hardness tests. The unit of hardness given by the test is known as the Vickers Pyramid Number (HV) or Diamond Pyramid Hardness (DPH).

OMEGA SRT-15/150 Dual Superficial / Rockwell Hardness Tester

INSTRUCTION MANUAL

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: <http://www.metallographic.com>

MICROHARDNESS

Microhardness testers are both mechanical and optical measuring tools. The indent is produced by applying a known load to the specimen and then measuring the size of the appropriate diagonals either optically or with image analysis software.

Microhardness is primarily determined with either a Knoop or Vickers indenter under test loads in the range of 1 to 2000 gram-force. Microhardness is used to measure the hardness of specific phases, small particles, and for brittle materials.

Knoop hardness (HK) number is based on the size of the indent that a rhombic-based, pyramidal diamond indenter produces under a known applied load. The HK number is calculated by dividing the applied load (kilogram-force) by the projected area of the indentation (square millimeters).

The Vickers hardness (HV) number is obtained by dividing the applied load in kilogram-force by the surface area of the indentation. The area of the indentation produced from the Vickers square-based pyramidal diamond is determined by the mean distance between the two diagonals of the indentation.

8.0 Appendix RS232 Connector

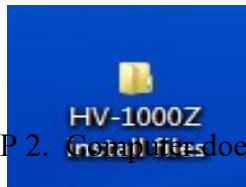

For Window XP HyperTerminal is already installed. If you are using WIN7 the program needs to be installed with the CD provided.

Also if your computer has an RS232 port use this port instead of the USB port. If you do not have an RS232 port you will need to install a conversion driver.

First determine which scenario fits your computer.

- A. Window XP with RS232 port (Step 4 only)
- B. Windows XP without RS232 port (need to install conversion programs - PL203_Prolific_DriverInstaller_v10518) (Step 1,2 and 4)
- C. Window WIN7 without RS232 port (need to install conversion programs - PL203_Prolific_DriverInstaller_v10518 and Hyperterm software) (Step 1,2,3)
- D. Window WIN7 with RS232 port (need to install Hyperterm) (Step 1 and 3).

STEP 1. Load Install Files to Desktop or other easy to find location and connect cable to tester and turn on

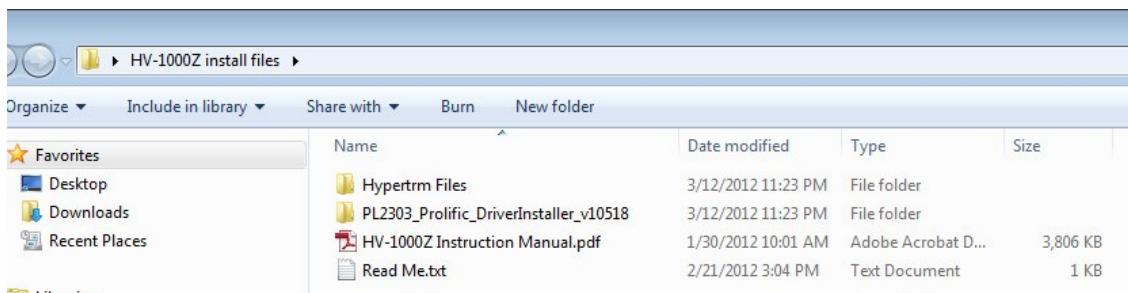

STEP 2. Computer does not have an RS232 port (need to adapt to USB port)

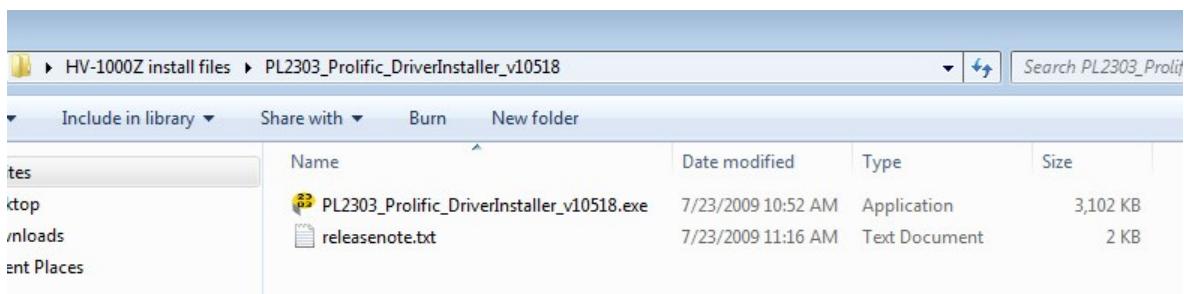

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: <http://www.metallographic.com>

Use the following procedure:

- Open HV-1000Z Install File Folder

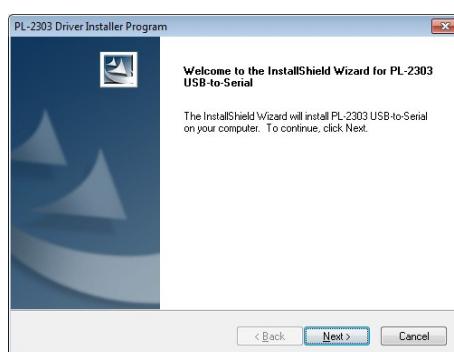

- Double click or open **PL203_Prolific_DriverInstaller_v10518** file
- Double click or run **PL203_Prolific_DriverInstaller_v10518.exe**

-Follow installation procedure (Click on NEXT)

-After

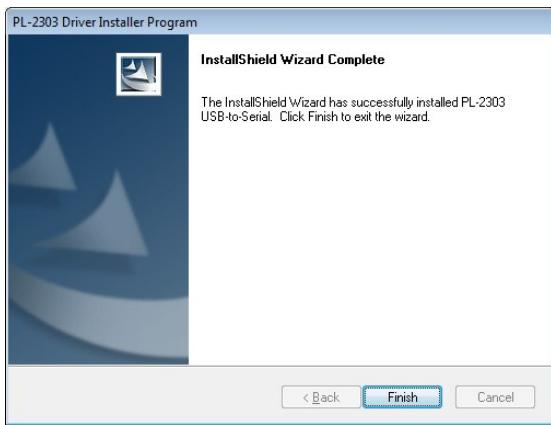

installation is complete (Click on FINISH) and

OMEGA SRT-15/150 Dual Superficial / Rockwell Hardness Tester

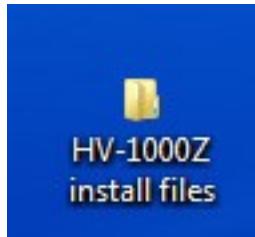

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: <http://www.metallographic.com>

restart computer.

STEP 3. Computer uses WIN 7 and does not have Hyperterm installed.

- Double click to open HV-1000Z installation file

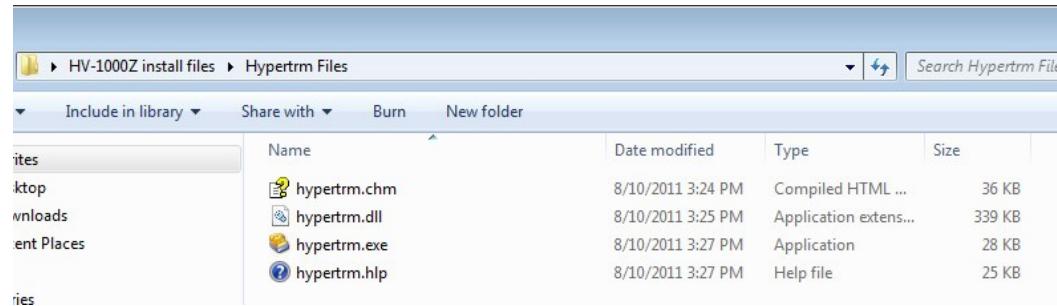

Name	Date modified	Type	Size
Hypertrm Files	3/12/2012 11:23 PM	File folder	
Pl	3/12/2012 11:23 PM	File folder	
H	3/12/2012 11:23 PM	Adobe Acrobat D...	3,806 K
R	3/12/2012 10:01 AM		
	3/12/2012 10:04 PM	Text Document	1 K

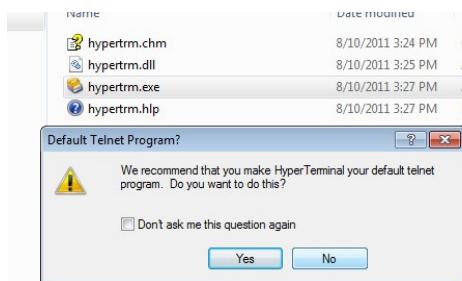

Double click or open Hyperterm Files folder

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: http://www.metallographic.com

- Double click or Run hypertrm.exe

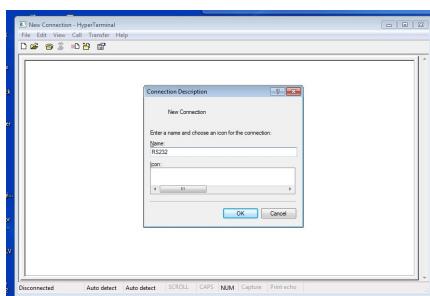

Answer NO to question

-Name: Input

RS232. Click OK

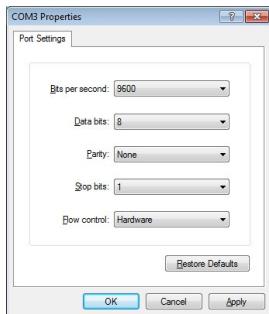

- If hardness tester was on and connect the correct COM port should be selected. Click OK. Note if connect using TCP/IP (Winsock) is displayed the computer was not rebooted after adding RS232 to USB conversion and

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: http://www.metallographic.com

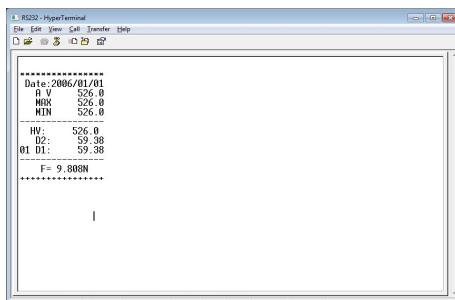

needs to be rebooted.

-Change the Bits per seconds to 9600. Click OK

- pressing

HyperTerminal will now be available to accept the data by PRT

-NOTE:
the
following to access the program the next time you use it (A bit inconvenient, however this is because Microsoft does not support this 3rd party software anymore).

FOR WIN7 if you turn off computer or close HyperTerminal connection you will need to do the following to access the program the next time you use it (A bit inconvenient, however this is because Microsoft does not support this 3rd party software anymore).

1. Open Hyperterm Folder (on Desktop if saved there during installation)
2. Double click on Hyperterm.exe
 - Choose NO
 - Cancel or "X" out of window.
3. File > Open > Select RS232.ht file (if using same USB port as it was installed on)

STEP 4. To set-up with Windows XP

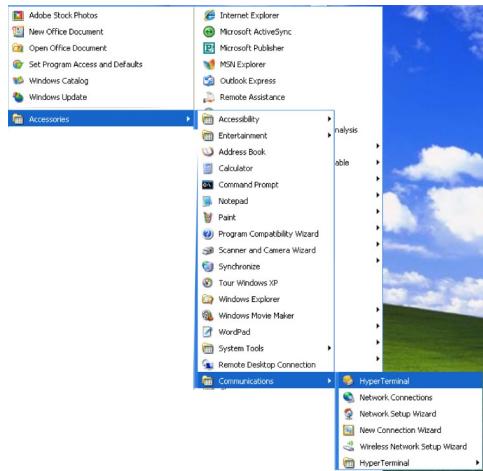

-Click Start, ALL Programs Accessories Communications Hypertrm

Please read this instruction manual carefully and follow all installation, operating and safety guidelines.

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: http://www.metallographic.com

-In the
Name

new connection box, enter “RS232” in the field and click OK

-In the
using

Connect To dialogue box choose the appropriate COM port from the Connect drop down box, Click OK

OMEGA SRT-15/150 Dual Superficial / Rockwell Hardness Tester

3601 E. 34th St. Tucson, AZ 85713 USA Tel. +1 520-882-6598 Fax +1 520-882-6599 email: pace@metallographic.com Web: http://www.metallographic.com

-In
the
be

the Port Properties dialogue box, select 9600 for Baud rate, and leave other parameters unchanged, Click Apply, OK and HyperTerminal will connected to the tester.
