

### Coolant / Recirculating System

The TP-TANK is a portable coolant recirculating system for use with our TERAPRESS line of mounting presses. Featuring a built-in heat exchanger with programmable thermostat for maintaining coolant temperature. The TP-TANK offers both economic and environmental benefits by reducing the reliance of building utilities such as water and sewage.

#### FEATURES:

- Heat exchanger with programmable thermostat
- 24V pump (connected to 110V power supply)
- 1.3 GPM maximum flow
- Easy to use
- Easy to operate

### Technical Specifications:

| Feature                   | Specification                                 |
|---------------------------|---|
| Cooling                   | Programmable                                  |
| Pump                      | 24VDC Diaphragm Pump,<br>1.3 GPM (5 L/min)    |
| Dimensions<br>(W x D x H) | 31.5 x 16.5 x 25-inch<br>(800 x 450 x 635 mm) |
| Tank Volume               | 14 gallons (53 L)                             |
| Weight                    | 40 lbs (18 kg)                                |
| Part Number               | TP-TANK                                       |
