Section 6: Accidental Release Measures

STEPS TO TAKE IF MATERIAL IS SPILLED OR RELEASED:	Evacuate the area of all unnecessary personnel. Wear suitable protection equipment as listed under Exposure Controls / Personal Protection. Eliminate all sources of ignition. Contain the spill and eliminate its source, if this can be done without risk. Take up and containerize for proper disposal as described under Disposal Considerations. Comply with all government regulations on reporting releases.

Section 7: Handling and Storage

- Keep container closed.
- Store in a cool area away from ignition sources and oxidizers.
- Do NOT breathe vapors.
- Do NOT get in eyes.
- Avoid prolonged or repeated skin contact.
- Electrically ground all equipment when handling this product.

Section 8: Exposure Controls/ Personal Protection

- * If workplace exposure limits are exceeded (reference TLV/PEL), a NIOSH/MSHA approved air supplied respirator is advised in absence of proper environmental control. Engineering and administrative controls should be implemented to reduce exposure. Transfer material in an approved fume hood or with adequate ventilation.
- * Protective Gloves (butyl rubber, PVC or equivalent) should be worn to prevent skin contact.
- * Safety glasses with side shields must be worn at all times.
- * Wash thoroughly after handling. Do NOT take internally. Eye wash and safety equipment should be readily available.

OSHA PEL and ACGIH TLV

Isopropyl Alcohol: 400 ppm (980 mg/m³) 8 hour Time weight Average and 500 ppm (1225mg/m³) Short Term Exposure Limit.

RESPIRATORY PROTECTION:

If engineering controls do not maintain airborne concentrations below recommended exposure limits, an approved respirator must be worn. Respirator type: mist; organic vapor. If respirators are used, a program should be instituted to assure compliance with OSHA Standard 63 FR 1152, January 8, 1998.
